

The list of ACR equipment manufacturers producing systems designed for use with hydrocarbons, (HCs), has grown significantly over the last few years. There are thousands of HC based systems in operation throughout North America, and these systems are already coming into service.

**Here is a list of manufacturers that are currently producing HC based systems.**

**Manufacturers producing ACR equipment with R-290 (Refrigerant grade propane)**

- |                       |              |
|-----------------------|--------------|
| TRUE Refrigeration    | Norpole      |
| Turbo Air             | Machine Chef |
| IDW                   |              |
| ATOSA                 |              |
| Delfield              |              |
| Traulsen              |              |
| Royal Vendors         |              |
| Kelvinator Commercial |              |
| Imbera                |              |
| Liebherr              |              |

**Manufacturers producing ACR equipment with R-600a (Refrigerant grade isobutane)**

- |                           |                 |
|---------------------------|-----------------|
| IDW                       | Fisher & Paykel |
| Summit Professional       | Beko            |
| Summit Classic Collection | Bosch           |
| Turbo Air                 | Avanti          |
| MKE                       | Danby           |
| Entrée                    | Dayton          |
| Serv-Ware                 | EdgeStar        |
| Kool-It                   | Electrolux      |
| Maxxcold                  | GE Monogram     |
| Centaur Plus              | LG              |
| Artic Air                 | Midea           |
| Firscool                  | Mitsubishi      |
| Kelvinator Commercial     | Samsung         |
| Whirlpool                 | U-line          |
| Haier                     |                 |
