## Callender Promoted To Regional Business Director

ICOR International, Inc., producer of Hot Shot®, Hot Shot-2™, One Shot-C®, and NU-22B® refrigerants, is very pleased to announce the promotion of David Callender to Regional Business Director. David has been assigned to ICOR's Mid-Western region and will be providing ICOR distributors, and their refrigerant customers, with sales and technical support throughout his respective region.

David served as Technical Support Supervisor for ICOR from 2006 to 2011 where he provided refrigerant users with valuable field support as they transitioned away from ozone depleting refrigerants. He was then tapped to head up ICOR's Eastern refrigerant reclamation business and served in that position until his most recent promotion in March of this year. Prior to working for ICOR David served as a commercial HVACR field technician with a career spanning over 26 years. His initial education and experience started in the US Navy Seabees. After 8 years with the Seabees David worked as a commercial refrigeration technician and project manager for a mechanical contractor based in Virginia until accepting a Tech Supervisor's position for a large Midwestern grocer chain. His diverse background includes installing and servicing equipment ranging from commercial roof top AC systems, reach in / walk in coolers / freezers, grocer rack systems, reciprocating and centrifugal chilled water systems, and commercial / industrial air drying systems. David possesses an EPA 608 Universal Certification, ICE – Commercial Certification, Journeyman HVAC License, and Master HVAC License. He is also an RSES CMS (Commercial Refrigeration) member and is a NATE certified technician.

"As a result of the accelerated phase out of R-22, an estimated 30-35% of refrigerant users are transitioning to an HFC alternative like NU-22B", said Gordon McKinney, ICOR's VP/COO. "David Callender is a tremendous technical resource for the distributors and refrigerant users in his region. Having assisted with, and even conducted, numerous system conversions he is an authority on the subject of alternative refrigerants and we are very proud to have him on the ICOR team."

For a complete listing of ICOR's national and regional support personnel go to [www.icorinternational.com/ICOR\\_Support\\_Map.pdf](http://www.icorinternational.com/ICOR_Support_Map.pdf). ICOR International's offices and production facility is located in Indianapolis, Indiana. Business hours are from 7:30 am to 4:30 pm EST. for more information on ICOR products or to locate an ICOR products distributor in your area call (800) 497-6805 or go to; [www.icorinternational.com](http://www.icorinternational.com)
